Week Number: 7

Date: 25 - 29 / 8 / 2024

Trainee Name: Samar Al-Khayyat

Description of tasks / Assignments:

The 3rd week's task working on my application, focused on handling and managing data.

I began by structuring the necessary data in JSON format, ensuring it was well-organized and appropriately modeled to meet the requirements and be in the most convenient shape.

To simulate a server, I utilized Postman to set up a mock server, allowing me to upload and view the data without relying on a live backend. The connection facilitated data integration into various pages within the application as needed, ensuring that the information was readily accessible and properly formatted for use.

Training Supervisor's Remarks:

The tasks were followed up and explain to him (mock server on Postman)
